About the C42

This model is based on the data available from

<http://www.comco-ikarus.de/Pages/index.php?lang=en>

and a range of images and online videos.

Thanks to Jon F <http://forums.x-plane.org/index.php?showuser=55080> for his support and real world experience with this aircraft.

A huge thanks to danklaue <http://forums.x-plane.org/index.php?showuser=3424> for his excellent Plane Maker Video Tutorials and his follow up advice.

Animated flight controls pack V1

Getting started

Start up is a little different with the Rotax 912-ULS.

Open **Main Fuel Valve** located on the right hand side of the left side foot well.

Note the **Throttle Control** directly in front of both left and right seats (Bottom left of image)

Rotate the **Master Switch** (Key switch)
anti-clockwise (click-drag left)

Turn on (click-drag up) the **electric fuel
pump (Aux Pump)**

Brakes on (left of Icom radio)

Left and Right Magnetos on (click-drag
up)

Choke full out (click-drag down)

Choke off after start (click-drag up)

Opening and Closing the Doors

To open the Gull-Wing doors, click the upper point of blue shaded area of the door handle or drag the “silver” bar upwards until the doors open

To close the Gull-Wing doors, click the lower point of blue shaded area of the door handle or drag the “silver” bar downwards until the doors close.
